FREQUENTLY ASKED QUESTIONS

Did the full synthetic 5W-40 replace the synthetic blend 5W-40?

Yes – the full synthetic 5W-40 is the next generation of fluid technology and has performance that exceeds the former 5W-40 synthetic blend.

Why did we formulate a new 5W-40 engine oil?

Rotax engine technology is continually evolving with more efficient and powerful engines that require greater levels of protection. This engine oil was tested and proven to ensure optimum performance in all Rotax applications.

Why did a full synthetic 5W-40 replace a synthetic blend?

Engine oil technology continues to evolve, and the improved performance of modern Rotax engines require a higher-quality lubrication.

Is the new 5W-40 synthetic compatible with superchargers and turbochargers?

Yes. The precisely tuned friction of the new 5W-40 synthetic meets the demands of supercharged and turbocharged engines in ways oils of prior generations could not – synthetic and blend alike.

Are XPS 4-stroke oils compatible with each other and ok to mix if I'm topping off or haven't completely drained the sump when changing oil?

Yes – all XPS 4-stroke engine oils are compatible and won't cause damage if mixed.
